## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-22 are allowed.

The following is an examiner's statement of reasons for allowance:

The subject matter of the present invention differs from the teachings of the prior art in that the present invention comprises low friction, self-lubricating rotary control valve components, which are useful for delivering liquid streams that contain a carbon-containing feedstock. None of the prior art teaches or suggests the use of low friction, self-lubricating control valve components with a coefficient of friction that is less than 0.25, in order to direct fluid flow and pump a carbon-containing feedstock. It cannot be considered obvious to a person skilled in the art, with knowledge of the references cited in Form 892, to use a low friction, self-lubricating control valve surface with a coefficient of friction that is less than 0.25, to direct fluid flow of a carbon-containing feedstock.

Furthermore in regard to claim 17, the subject matter of the present invention differs from the teachings of the prior art in that the present invention comprises a feedstock delivery system with a plurality of piston seals, which have a base that extends around the piston and a pair of spaced apart arms which define a channel there-between. None of the prior art teaches or suggests the use of a feedstock delivery system with a plurality of piston seals, which have a base that extends around the piston and a pair of spaced apart arms that define a channel there-between, in order to better seal the compression cylinder while pumping a carbon-containing feedstock. It cannot be considered obvious to a person skilled in the art, with knowledge of the

references cited in Form 892, to use a feedstock delivery system with a plurality of piston seals, which have a base that extends around the piston and a pair of spaced apart arms that define a channel there-between.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
